

RTITB FORK LIFT TRUCK

General

It is a legal requirement under the Health and Safety at Work Act of 1974 that all those who operate Lift Trucks and associated machinery should be correctly trained in their safe usage.

We offer either RTITB training courses on the following types of truck:

- ❖ Counterbalance
- ❖ Reach
- ❖ Pedestrian Pallet Loaders

We offer the following training courses dependent upon the training needs of the operator:

Re-certification or Refresher	For individuals with previous certification of training (the old certificate or evidence of previous training must be provided).
Experienced Operator	For individuals without evidence of formal training but with substantial operator experience.
Novice training	For those with no experience of FLT operation.
Conversion courses	For individuals certified on one truck type that now need to operate another type e.g. a counterbalance operator who now needs to operate a reach truck.

Course Content

The course content is based on the Health & Safety Executive recommendations for Lift Truck training. Courses are liable to inspection at any time by the RTITB whether at a customers premises or at the Training Centre.

Course Duration 1 – 5 days depending upon requirements

Course Loading Max trainee / instructor ratio is 3:1

Course Location Public courses are held regularly at Specialist's training centre at Altham, Lancashire or at customer premises or suitable nearby locations nationwide.

Certification Upon successfully passing the RTITB test the trainee will be issued with an "RTITB Basic Operators certificate."
